Bornfire Anti-Money Laundering Solution

Bornfire Anti-Money Laundering Solution operates on a much broader level and are the measures that institutions take to prevent and combat money laundering, terrorism financing, and other financial crimes. BAML solution use AML/KYC compliance to maintain secure financial institutions.

Notational Convention

This chapter describes the notational conventions

Convention	Description
Bold	Indicates field and tab names appearing on user Interface Screens
Note:	Indicate that a note follows
Overview	Indicates the introduction to the chapter/topic
Italics	Indicates cross reference and user input

Screen Details

The table provides details pertaining to the displayed screen with field description and the action the user needs to take:

No	Components	Attributes
1	Field Name	The Name of the Field
2	Description of the Field	The description of the Field
3	Field Indicator	Represented by any of the field types Mandatory – A value must be entered in the field to complete the task at the end Optional – A value can be entered in this field, but it is not essential to execute the task at hand Display – The value in this field is maintained and displayed by the system and cannot be modified. For this field indicator, details like type, length and valid values may not be given

No	Components	Attributes
		Co-mandatory – If an entry is made in a particular field, input in a related field becomes mandatory. For example, consider three fields A, B and C. Field A is mandatory and field B is optional. If you enter a value for field B, then C becomes mandatory. In this case field C is co-mandatory.
4	Field Type and Length	The field length is indicated as a numeric value. The field type can be represented by any of the following. Alphanumeric – The entry can be only letters, only numbers or a combination of both Numeric – The entry can be only numeric Date – The entry is a <u>date</u> in the specified format Account Number – The entry is an <u>account number</u> Amount – the entry is an <u>amount</u> in the specified format Total Amount – The entry is a <u>total amount</u> in the specified format Rate – The entry is an <u>exchange rate</u> in the specified format Placeholder – the Entry is an account <u>placeholder</u> in the specified format Frequency – the Entry is a <u>frequency</u> in the specified format Percentage – The entry is <u>percentage</u> in the specified format
5	Drop Down List	The values for this field are given in a drop down list
6	List	If List appears below a field name in the Screen Details table, it indicates that a list of valid values exists for the field. Clicking on List displays valid values for the field. You can select the value to be entered in the field from this list,

No	Components	Attributes
7	Explode	If explode appears below a field name in the Screen Details table, it indicates that additional details about this field can be viewed and accessed. Clicking on Explode displays additional details of the field/record. For example, clicking on Explode at Customer ID field displays customer details.
8	Scroll	If Scroll appears below field name in the Screen Details Table, it indicates that you can scroll to the right and left of the field to view the complete text entered in that field
9	Edit-Field	If Edit-field appears below a field name in the Screen Details Table, it indicates that you can view and edit the complete text in the pop-up window. Clicking on Edit-Field displays Zoom edit window.
10	Valid Values	The values valid for the field

Points to Note:

1. Screen Level Help is available for each screen on the screen.

1. Bornfire Anti-Money Laundering Solution

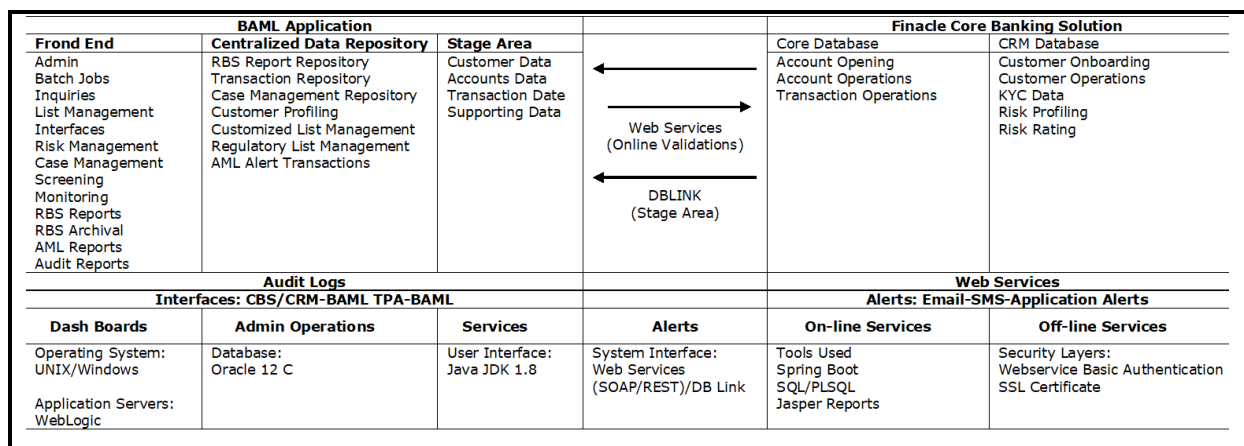

Bornfire Anti-Money Laundering is a **fraud detection software** dedicated to financial institutions obligated to monitor, investigate and report transactions of a suspicious or unusual nature to financial investigation units. It optimizes the existing anti-money laundering processes by significantly enhancing the effectiveness of most commonly used – and inefficient – rule-based approaches, characterized by high false-positive rates, and unable to consider complex interdependencies between various activities carried out to launder money. Rule-based systems produce alerts which form a data set which is used for Risk Ranking algorithm.

1.1. Introduction

Bornfire Anti-Money Laundering Solution uses a live global database with the data relating to Core Banking Solution (Customer, Account and Transactions), Customized and Regulatory Listing, AML Parameters, AML Alert Operations and Transactions. BAML solution facilitates rule based transaction monitoring, Parameterised operational screening, alerts to approval authorities and inquiries. Solution also supports generation of RBS and AML reports.

1.2. BAML Architecture

The following diagram depicts the solution architecture.

1.3. BAML Modules

Bornfire Anti-Money laundering supports the following modules.

- A. Admin
- B. Inquiry
- C. List Management
- D. Risk Management
- E. Case Management
- F. Third Party Transactions
- G. Interfaces
- H. Screening
- I. Monitoring
- J. RBS Reports
- K. RBS Archival
- L. AML Reports
- M. STR Reports
- N. Audit Logs
- O. Dash Boards

1.4. Login Operations

1.4.1. Login Screen

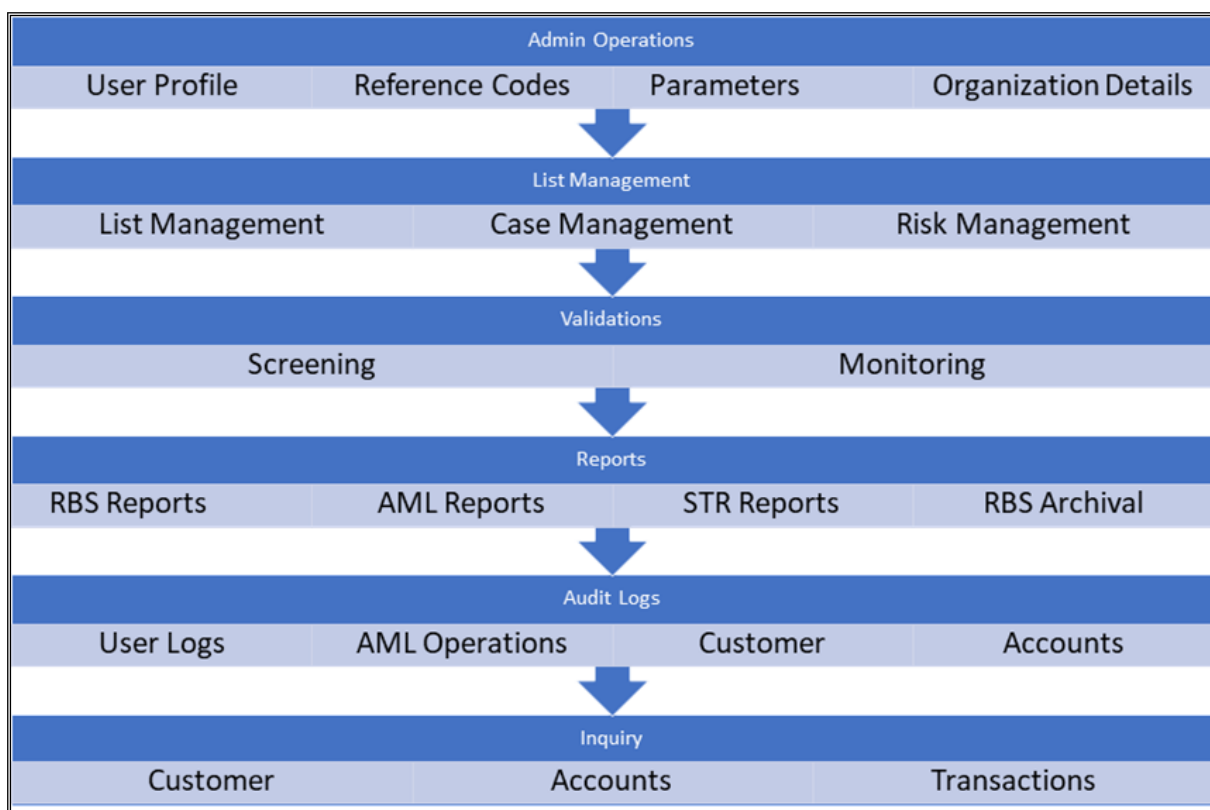

1.4.2. Login Credentials

The following are the login validations.

- The user should have a record in the "User Profile"
- Valid password and it should be in force withing the password life cycle
- User record should be in active status
- Login should be within the login low and high time
- Should not be disabled
- Should have a valid "Role Id" for accessing the menu options
- User can access the menu / screen options according to "Role Id"
- User can perform operations according to the rights available for the "Permissions"
- Application keeps records of login attempts with 'Success' and 'Failure' status.

2. Modules

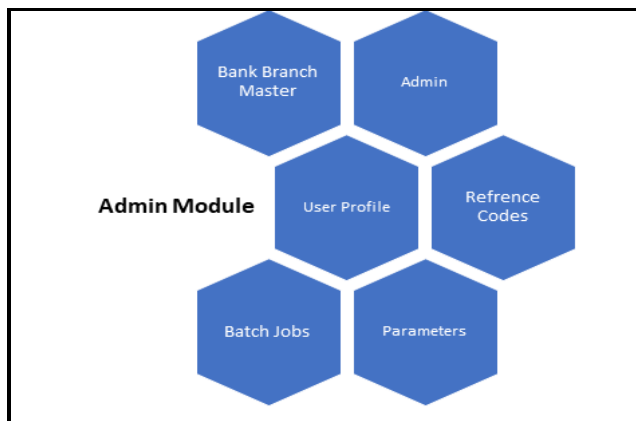

3. Admin Module

3.1. Overview

The administration module is used to configure and maintain

- The user profiles
- the solution related parameters
- alert messages and notifications
- batch job and schedules

3.2. Diagram

3.3. Menu Options

Admin module has the following menu options and screens.

- User Profile Maintenance
 - User Profile
 - Access and Roles
- Reference Code Master
- Bank and Branch Details
- Parameters
- Alert Parameters
- Screening Parameter
 - Customer Type and Limits
 - Loan Schemes and Limits
- Monitoring Parameters
- Rule Engine
- Batch Jobs

3.4. User Profile Maintenance

User Profile Maintenance supports maintaining the "User Profiles" and "Role Id" for controlling the users "Access and Roles". "User Profile" and "Access and Roles" are the sub-menus available. User Profile Maintenance supports the following operations.

- List
- Add
- Modify
- Verify
- Cancel
- Delete
- Inquire

3.4.10. Access and Roles – Add

The screenshot shows the 'Access and Roles - ADD' form within the BORNFIRE Anti Money Laundering application. The form is located in the center of the screen, with a sidebar on the left containing a navigation menu. The sidebar menu includes 'Admin' (User Profile Maintenance, User Profile, Access and Roles, Reference Code Master, Bank and Branch Details, Parameter, Batch Jobs) and 'Inquiry' (List Management, Case Management, Risk Management, Interfaces, Screening, Monitoring, RBS Report, RBS Archival, AML Reports, Audit Log). The form itself has the following fields: Role Id (text input), Role Description (text input), Permissions (dropdown menu with 'Select' as the current value), Remarks (text input), Work Class (dropdown menu with 'Select' as the current value), and Menu List (text input). There are 'Submit' and 'Cancel' buttons at the bottom right of the form. The top of the application window shows the 'Anti Money Laundering' logo and the user's name 'BORNFIRE' with a 'Logout' button.

Access and Roles – Add

User can add new Role Ids to attach the user profiles.

Field	User Action	Description
Role Id	Drop Down Values	List the Role Ids available
Role Description	Drop Down Values	Auto Select to Role Id
Permissions	Write, Read	User can select the option
Remarks	Free Text Field	
Work Class	Enter the Work Class	
Menu List	List available for selection	
SUBMIT	Click to Create the Record	
CANCEL	Click to go back to the previous Screen	

3.4.12. Access and Roles – Verify

The screenshot shows the 'Access and Roles - VERIFY' form in the Anti Money Laundering system. The form is displayed within a web application interface with a blue header and a left sidebar menu. The form fields include Role Id (ADM), Role Description (ADMIN), Permissions (Read), Remarks (ADMIN ROLE), and Work Class (Maker). A Menu List is also visible on the right side of the form. The form has 'Submit' and 'Cancel' buttons at the bottom.

Access and Roles – Verify

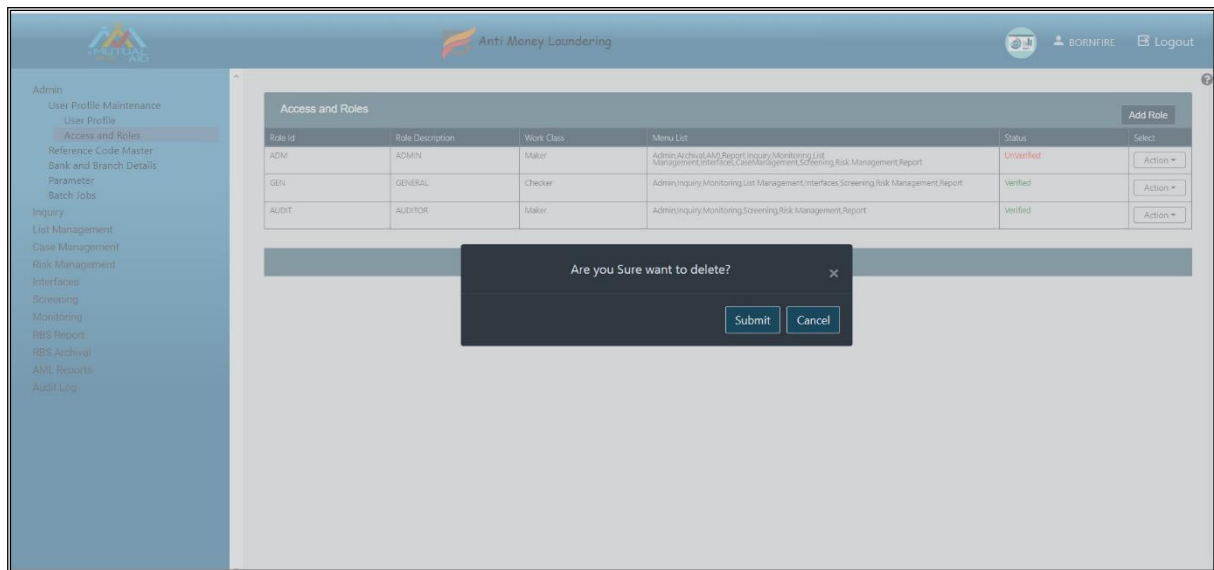

User can verify the news records added and existing records modified.

Field	User Action	Description
Role Id	Display	Display the values
Role Description	Display	Display the values
Permissions	Display	Display the values
Remarks	Display	Display the values
Work Class	Display	Display the values

3.8.3.Operation Parameter – Modify

The screenshot displays the 'Anti Money Laundering' application interface. On the left is a navigation menu with options like Admin, Inquiry, List Management, Case Management, Risk Management, Interfaces, Screening, Monitoring, RBS Report, RBS Archival, AML Reports, STR Reports, and Audit Log. The main content area shows a 'Modify' form for an operation parameter. The form has the following fields:

- MENU:** ACCT
- TABLE:** ACCOUNTS
- VALUE:** Monthly Income
- FIELD:** ANNUALREVENU
- ALERT USER ONE:**
 - USER ID:** SRINI
 - NAME:** SRINIVASAN K
 - MOBILE:** (empty)
 - EMAIL:** srinivasan.k@bor
- ALERT USER TWO:**

3. Inquiry Module

4.1. Overview

The inquiry module facilitates general inquiries on Customer, Accounts and Transactions with mining options (drill down options) with reference to the AML guidelines. Customer and account related audit log also available for review. This option reduces the dependency on Core Banking by the Compliance to make inquiries and reviews on the Customer Data.

4.2. Diagram

4.3. Menu Options

Inquiry Module has the following menu options and screens.

- Customer Inquiries
 - List
 - Customer Profile
 - Customer Accounts
 - Customer Transactions
 - Customer Audit Logs
- Account Inquiries
 - List
 - Account Profile
 - Account Transactions
 - Accounts Audit Log
- Transaction Inquiries
 - List
 - Other Part Transactions

Note: Drill down (Explode) option is available for all Customer Id / Account Number / Transaction Id to travel to the Master Records.

4.4. Customer Inquiry

4.4.1. Customer Inquiry List

5. List Management

5.1. Overview

Centralized Data Repository for managing the customized and Regulatory list and sanctions. The lists are being updated periodically and are being used for screening the customer data online, offline and batch mode. All these lists are used for validating the data on customer on-boarding, account opening, customer and account related operations for possible matches. Validations happen on batch mode, online, offline and real time basis.

5.2. Diagram

5.3. Menu Options

List Management module has the following menu options and screens

- Customized Listing
 - Customer Blacklisting
 - Individual
 - Corporate
 - Customer Negative Listing
 - HNWI Listing
 - Abandoned Fund Listing
- Regulatory Listing
 - United Nations Security Council (UNSC) Listing
 - Individual
 - Entity
 - Politically Exposed Persons (PEP) Listing

5.4. Blacklist

5.4.1. Corporate Blacklisting

CUSTOMER BLACKLISTING

This screen displays the list of blacklisted customers – corporate and individuals, for further inquiries and reviews.

Individual Blacklisting	Corporate Blacklisting	Select the Required Tab

6. Risk Management

6.1. Overview

Risk Management module supports maintaining the data relating to 'Customer KYC', "Customer Risk Profiling" and "Customer Risk Rating". This module fetches the base customer data from the "Core Banking" and permits the users to maintain the KYC in accordance with the risk categorization/risk rating of the customers. As part of KYC, BAML supports capturing the document details for completing the KYC compliance.

6.2. Diagram

6.3. Menu Options

Risk Management module has the following menu options and screens.

- KYC Parameters
- Customer KYC
 - Document Maintenance
 - Customer KYC History
 - Customer Risk History
 - Risk Maintenance

1.KYC Parameter

To modify the input Report T6.

1.KYC Parameter - Inquiry

The screenshot displays the 'KYC PARAMETER' inquiry screen. It features a table with the following data:

Frequency of reviews for customers whose risk grade is (pick from appropriate drop down options)	Low	Medium	High
Individuals	3 TO 5 YEARS	ONCE IN 3 YEARS	ANNUAL
Corporates	3 TO 5 YEARS	ONCE IN 3 YEARS	ANNUAL
Non Profit Organisations	3 TO 5 YEARS	ONCE IN 3 YEARS	ANNUAL
Trusts (Other than NPOs and TCFs)	3 TO 5 YEARS	ONCE IN 3 YEARS	ANNUAL
All others	NOT APPLICABLE	NOT APPLICABLE	ANNUAL

9. Screening Module

9.1. Overview

This module supports the screening operations with Regulatory Lists (UNSC and PEP) and Customized Lists (Blacklisting and Negative Listing). Provision is available for Online, Offline and Batch Mode screening jobs. Inquiries can be made basing on the screening rules. Reports can be generated. Avoid breaching financial and trade sanctions, by screening against UNSC, PEP, Black and Negative Listing.

9.2. Diagram

9.3. Menu Options

The Screening Module has the following menu options and screens.

- Customer Operations
- AML Alert Operations
- Screening Operations Report Download

9.4. Screening Operations

The screenshot displays the 'Screening Operations' interface. On the left is a navigation menu with options: Admin, Inquiry, List Management, Case Management, Risk Management, Interfaces, Screening, Screening Operations, Screening Alert Operations, Screening Report Download, Screening Values, Monitoring, RBS Report, RBS Archival, AML Reports, STR Reports, and Audit Log. The main area is titled 'Screening Operations' and contains three tabs: 'Customer Type And Limits', 'Loan Schemes And Limits', and 'Operations Parameter'. The 'Customer Type And Limits' tab is active, showing a form titled 'Customer Type And Limits Operations'. The form includes fields for 'Select Rule Code' (CON001), 'Code Description' (MQL1), 'Customer type' (Civil Servants), 'Customer Sub Type' (Attendants), 'Ceiling(Rs)' (300,000.00), 'Date' (14/01/2020), 'Other Condition', and 'Remarks' (TESTS). A search icon is next to the 'Select Rule Code' field. Below the form is a table with columns: Report Date, Operation, Customer ID, Account No, Account Name, Date of Loan, and Loan Amount (Rs). The table contains three rows of data. At the bottom of the interface are 'Home' and 'Back' buttons.

11.RBS Reports

11.1. Overview

RBS reports can be generated and submitted to the regulatory. Summary and break up details are available for all the current reports for audit purpose.

Data from "Staging Area" should be compiled and moved to the "Details" according to each report requirement. Application arrives the report details in "Summary" as per the format. Users can "view / print / drill down" the Summary and details. The details can be massaged, wherever required. Application should keep the log of the modifications for audit purpose. Application generates the "RBS Reports" in EXCEL format for submission to the regulatory. The breakup details can be downloaded in EXCEL and CSV format for reconciliation and audit purpose.

11.2. Diagram

14.4. Overview

AML solution supports generating STR reports (Internal and External) and it also generates register of disclosure (Internal and External). The data input is manual. User can use the search button to select the transaction from Finacle to identify as STR and generate the report. For the selected transaction, system fetches the customer, account and transaction related details to the Input Screen. Users can enter the remaining details manually and generate the report. The report details automatically logged in the "Register of Disclosures" and the register can be viewed and printed for submission.

14.5. Diagram

14.6. Menu Options

STR module contains the following menu options.

- Register of Disclosures
 - Internal
 - External
- STR
